<u>Advanced Programmatic Methods</u>:

- ➢ In this section, I explore two advanced methods for enhancing the Python code developed in earlier stages of this project.

- ➢ Due to intellectual property concerns, the source code has been removed from this document.

- ➢ As indicated in the README file, if you are a recruiter or hiring manager interested in this project, I am available to provide a walkthrough and demonstration. Please reach out to me via LinkedIn.

- ➢ As of the latest update, there have been at least 5 clones of this repository. I hope that those who have cloned the repository have found the code beneficial for their learning journey. Feedback from users is always welcome and appreciated.
